

WHAT IS A SITUATIONAL JUDGEMENT TEST (SJT) ?

A situational judgement test is a psychological evaluation that presents test-takers with realistic, hypothetical scenarios

1 Purpose:

- Assesses how an individual will behave in certain situations
- Measures values and nonacademic skill sets

2 How to Prepare:

- No formal test prep
- Review pre-professional competencies
- Life experiences
- Familiarize yourself with test format and technical requirements

3 Existing Platforms:

Casper

- \$12 base fee & \$12 for each program selected

Format

- 12 sections (8-video based and 4-word based scenarios)
- 60-90 minutes in length
- Optional 15 minute break at halfway point
- Three questions per scenario with five minutes to respond
